

Press Release

World's largest Vertical Stirred Mills (6500 kW) order awarded to STM

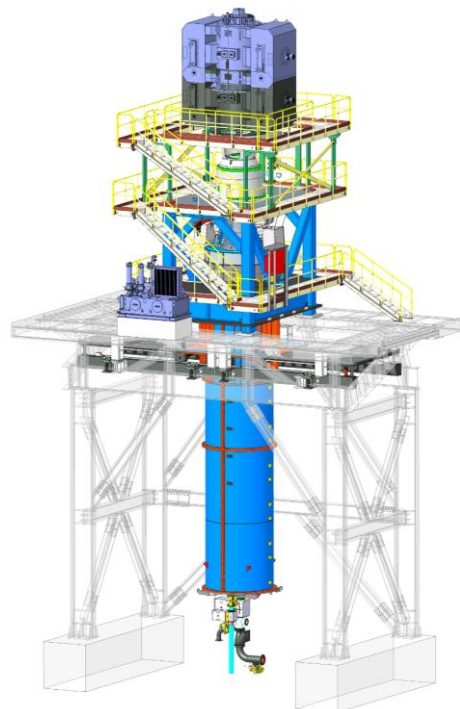

Baden, Switzerland, 14th of December 2021 – Swiss Tower Mills Minerals AG (STM) has been awarded an order for the delivery of four energy efficient VRM50000-6500 grinding mills for a large greenfield copper project in Russia. The project was awarded in second quarter 2021.

STM's scope includes the design, manufacturing and delivery of four Vertical Re grind Mills (VRM), each complete with a 6500 kW variable speed drive package and a user-friendly control system. Each regrind circuit will process up to 500 tonnes of flotation concentrate per hour. These mills will be by far the largest and most powerful stirred mills in the world. Deliveries will take place during 2022 and 2023.

Swiss Tower Mills Minerals AG (www.stmminerals.com) is an innovative company for grinding in the mineral industry. – *The Art of Grinding*
